Bob Bickers is an artist and photographer living and working from his home and studio in Murrysville, Pennsylvania. He developed a talent in photography and other arts early in life and as a young man was a camera salesman and started his own wedding photography business while working through law school.

Bob pursued a law career for over 32 years until he and his wife (and law partner at Bickers & Bickers) closed their office in Murrysville in 2015.

For the last 24 years Bob has been competing and winning recognition in local art shows, exhibitions and contests. His artwork is usually in oil and acrylic but he has always kept a camera at his side as another means of artistic expression. He maintains complete artistic control from taking the images to printing and framing the pictures himself.

This exhibit is a collection of Bob's digital photographs taken largely in the western Pennsylvania area. Most of these images have never been seen in public and represent a vision of natural beauty of this region in each of the seasons.
